PROFESSIONAL EXPERIENCES

2018

Front-end developer/ UI designer • AFPA • Montreuil

As a team of four, I was part of a from scratch web application project allowing to welcome people coming from Pôle Emploi to manage their professional knowledge and attendance.

As front-end leader, I was in charge of the UI using Adobe XD which I proposed to the customer, then I built the application using Angular 7 and Material Design.

Web integrator • St-Gobain • Paris

As a web integrator, I built the Angular components for the development team, then I expanded my skills by introducing new technologies. I was granted more responsibilities inside the company, which allowed me to proceed the integration of several other teams in project especially in the design aspect.

2017

Front-end developer • Excilys • Cachan

During my Master degree internship in computer security, I was in charge of building the frontend in Angular 5, the security of the backend in Java 8, and Sprint security of the new employee management web application. The team as SCRUM-based and composed of trainees. I was promoted Scrum Master.

Software engineer • Excilys • Cachan

Internship project to build a computer management application while following trainings: JAVA/JEE, Angular, Git, REST, and Docker.

EDUCATION AND ACADEMIC ACTIVITIES

2017

Master degree in computer security

Faculty of Science and Technology, Limoges, France

2014

Diploma of Higher Education

University Institute of Technology, Limoges, France

PERSONAL EXPERIENCES

2018

Angular youtube player (7) angular-youtube-player

In order to restart from scratch my main application Mix-it, I built my own Angular Youtube component responding to my needs.

Angular trainer

Participation and realization of the monthly Excilys intern Angular training. During these 2 days, we were starting from scratch with what is Angular and it's history. Then, the trainees had to build an application using REST and unit testing.

Mix-it mix-it

Music mixing app with React allowing a user to send a link of their favorite Youtube playlist. It permits to do smooth transition between songs from two different music players.

Based on an existing application, I built a mobile party game in React Native in order to train on mobile web development

2015 Project « L'annuaire lyonnais »

Application to connect companies and associations coeds with AngularJS
